

Exam – Basic Injury Response

True (T) or False (F)

1. T F All injuries must be reported to your supervisor no matter how minor.
2. T F The first step in responding to an injury is to assess the scene and determine if it is safe to respond.
3. T F 911 emergency services should be contacted for all injuries.
4. T F If 911 emergency services are called for an injury, it is important to send someone to the site's entrance to direct emergency services to the incident location.
5. T F Contacting 911 emergency services for an injury is only the Supervisor's responsibility.
6. T F Seconds do not matter when responding to an injury.
7. T F It is important to know who the site's trained first aid providers are.
8. T F It is important to know where the site's telephones are located and how to dial for 911 emergency services.
9. T F When contacting 911 emergency services, you should hang up only after being instructed by the emergency services operator.

(Select the best answer)
