

## Exam – Moving Stone Slabs with Fork Lifts

### True (T) or False (F)

1. T **F** Fork lifts may never be used to move stone slabs.
2. **T** F Fork lift drivers must be trained by their employers.
3. **T** F Fork lifts must be inspected before use on each shift.
4. T **F** It is OK to use a fork lift which does not pass inspection.
5. T **F** Stone slabs should always be moved in the horizontal (flat) position.
6. T **F** Stone slabs should be moved by a fork lift with the bottom edge of the slab 24 inches off the floor.
7. T **F** Fork lifts driving down a grade or down a ramp should always be driven in the forward direction.
8. **T** F A spotter should be used when moving slabs.
9. **T** F Rigging and lifting devices for stone slabs must be inspected before each use to ensure they are in good condition and good working order.
10. **T** F Lifting devices used on fork lifts must be approved for use by the fork lift manufacturer.
